by SIGMA

Ditson by Sigma Guitars: A name you can trust, a quality that lasts and all at a price anyone can afford.

After an adventurous and successful decade reinventing the legacy of Sigma Guitars through producing high quality acoustic instruments at the fairest prices on the market, I've decided to turn my focus to the up-and-coming musicians' needs with Ditson Guitars.

Ditson Guitars boast the models you love, the familiar feels and the smooth set-ups out of the box you know from Sigma all at an even more affordable price. A harmony offering the finest crafted acoustic guitars on the market for those without the interest in expensive or exotic materials.

Ditson offers classic shapes in a variety of finishes matched with robust construction, overseen by Sigma, for beginning musicians ready to pick up and play! From a bedroom to a bonfire to the stage, Ditson Guitars come equipped with reliable tuners and even Sigma-branded preamps on acoustic-electric models so you can be heard wherever YOUR musical endeavour takes you next.

They even come with the finest D'Addario Strings already wound up. What else could you ask for?

All that's missing is your fingers on the fretboard.

Take my word for it,
